# Review Recommendation

Paper Title: **Implementation of Machine Learning Based DoS Attack Prediction Techniques for Cloud Security**

Manuscript ID:

Dear Editor,

After I read carefully this paper my decision is: **This paper should be accepted subject to the following conditions:**

**1. In introduction section, the authors should provide contributions of this paper and clear support of limitations of existing schemes that are being addressed in this paper.**

**2. Paper's English is good in general but there are certain places that need attention. I suggest that it is checked by a native speaker before the final proof.**

**3. Could the authors elaborate on their limitations of the proposed model.**

**Thank you**

**Dr. Haider Khalaf Jabbar**
